

Model PCXB Portable or Surface Mount 10 Ft. Bench with V-Type Thermo-plastic Coated Expanded Back and Seat

SPECIFICATION
BULLETIN
#SPC-BC-233

REV. 07-24

Model PCXB3/G-10VU10 Portable/Surface Mount Bench with hot-dip galvanized frames, 10 Ft. long with 10" wide blue V-Type thermo-plastic coated expanded steel seat and back.

- Extra heavy design to be stronger and more stable with a simple, clean style
- Sturdy, formed and welded steel frame construction
- Frames are Hot-Dip Galvanized after fabrication for superior corrosion resistance
- Thermo-plastic Coating heat fused to Expanded Steel Back and Seat for durability
- Thermo-plastic Coating formulated with U.V. stabilizers for ultraviolet protection
- Quality construction throughout

SPECIFICATIONS:

- Model PCXB end frames are one-piece, welded construction with a back and seat bracket of 2-3/8" x 1-1/2" x 1/8" nominal sized, die-formed channel, and a 2.375" (2-3/8") O.D. post and foot to meet 2" nominal steel pipe size specifications. Frame foot is formed with flattened and rounded ends. A 9/16" hole is provided in each end of foot for optional surface mounting with concrete anchors (anchors not included).
- Model PCXB3/G-10 is 10 ft. long (nom.) with three frames and diagonal braces.
- **Standard:** All steel frame components are hot-dip galvanized after fabrication to ASTM-A123 to maintain an average zinc coating of 2.0 oz. per sq. ft. of surface area (indicated by "/**G**" in model no., e.g. PCXB3/**G**-10VW10).
- V-Type seat and back are each a one-piece welded construction, fabricated from a 3/4-#9 expanded steel surface with 10 ga. x 2-1/2" roll-formed vertical edges on all sides and reinforced by a 10 ga. die-formed angle substructure. Substructure includes all mounting holes for easy assembly of bench.
- Standard: All steel surfaces of the seat and back are covered with a thermo-plastic coating in a Brown color (indicated by "VW" in model no., e.g. PCXB3/G-10VW10). The UV-stabilized thermo-plastic coating is applied in a multi step process of material preparation and finish application designed to permanently heat fuse and bond the finish to the steel. The thermo-plastic polyethylene finish is impact resistant, does not support mold or mildew, and the textured matte surface is less susceptible to marring and scuffing.
- All fasteners are provided for assembly.
- **Optional:** Color choices of powder coated steel frame components. For optional colors choices see Specification Bulletin #SPC-CO-001.
- **Optional:** Color choices of Thermo-plastic coated steel components. For optional colors choices see Specification Bulletin #SPC-CO-001.
- **Optional:** Seat and back are each a 12" wide one-piece welded construction with 10 ga. x 2-1/2" roll-formed vertical edges on all sides. Indicate choice by changing "10" in model no. to "12", e.g. PCXB3/G-4VW12.
